

Keep Your Operations Running Smoothly

Empower teams with one solution to manage every aspect of your facilities.

Life Sciences

With Nuvolo Connected Workplace for Life Sciences, seamlessly connect your workplace and asset data to keep your operations running smoothly. By consolidating all your information, you can understand how your assets are being used, create dynamic workspaces, streamline processes, ensure compliance, make data-driven decisions, and more.

The Only IWMS Built for Life Sciences

Keep your facilities, labs, manufacturing plants, and quality processes running smoothly by consolidating all space, real estate, and asset information on one platform.

Reduce unscheduled manufacturing downtime, gain full visibility into your spaces, and plan for future workplace needs.

Maintain accurate records and ensure data quality with built-in compliance controls, including Part 11 compliant audit trails and validation documentation.

Manage the full lifecycle of your GxP and non-GxP assets in one place.

Connect your calibration activities to maintenance workflows, so internal and external teams work with the same information.

With this greatly improved access to information, we've been able to focus our efforts on the most critical pieces of equipment, and we've improved how we track service contracts and warranties, so we're not paying for work that, essentially, we've already paid for."

Vertex, Sr. Director of Corporate Real Estate & Facility Operations
